

KEY FACTS

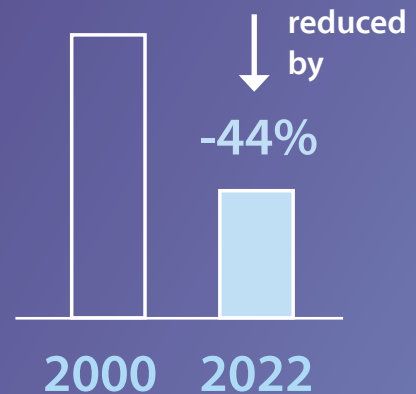

on neonatal care

Over 13 million babies
are born too soon
every year worldwide.

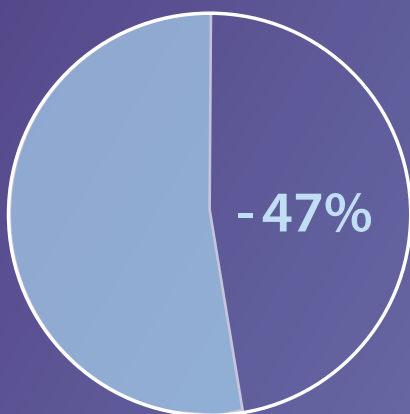

That's more than 1 out of 10 babies.

Newborn loss of life

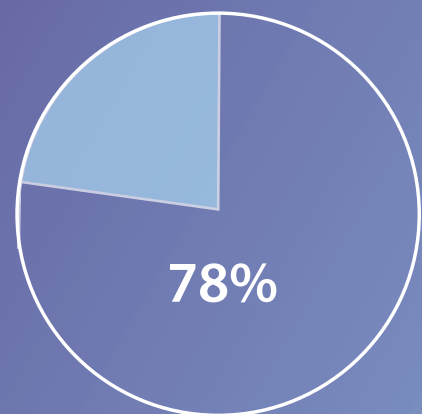

Still about 1 million babies lose their lives
each year due to being born too early.

Globally, being born preterm
is the leading cause of death in
children under 5 years of age.

Nearly half of children under the age of five
die in the newborn period (first 28 days).

Reasons for loss of life

Most newborn deaths (78%) are due to
complications related to prematurity,
complications during birth, infections,
and birth defects.
